7. Lower Spray Bar
8. Oil Skimmer
9. Pre Cleaning
10. Post Cleaning
11. Caster option for portable use.
12. Use for aluminum and cast iron.
13. Race shops use as cleaning after machining.

This rugged machine is designed for small parts and will clean even a V-8 Engine block, Cylinder Heads, Valve covers and a vast variety of small parts. The 110 is constructed with a 12 gauge steel cabinet, a 2 hp, 36 GPM 40 PSI main pump, lift out turntable, low water shut off and it's portable. The model 110 is the perfect Power Spray Washer for the service shop that is tired of standing at a manual parts washer working in solvents. The model 110 will eliminate the use of a Solvent Tank. It uses bio degradable heated solution that is re-circulated from the built in reservoir. Simply load the parts like your loading a dish washer turn on the cycle timer and come back to clean parts. The 110 rugged, heavy duty welded construction assures years of trouble free service and includes key features resulting in performance benefits. The model 110 provides a safe and efficient method to wash parts in both commercial and industrial applications.
